

# I WILL MAKE AMERICA GREAT AGAIN FOR YOUNG PEOPLE

<https://www.2thepointnews.com/i-will-make-america-great-again-for-young-people/>

With less than one year to go

until Election Day, the polls show that we are beating Joe Biden by wide margins both nationally and in the battleground states—and young people are a major part of the reason why.

A recent NBC News poll found that we are leading Biden 46 percent to 42 percent nationally among voters ages 18 to 34—a clear sign that young Americans are rejecting Joe Biden’s reign of failure, incompetence, and corruption.

During the first Trump administration, we created the strongest and most prosperous economy in the history of the world. Under my leadership, annual incomes went up by more than \$6,000, inflation was under 2 percent, and we had gasoline down to \$1.87 per gallon.

Household net worth reached an all-time high, with the bottom 50 percent of American households seeing a 40 percent increase in their net worth.

The U.S. economy had never been better for young Americans, but for the past three years, young people have borne the heavy costs of the failed Biden agenda: crippling inflation, soaring prices, skyrocketing interest rates, unaffordable housing, and escalating crime.

Over the course of the Biden administration, real incomes have gone down by \$7,400 per family. Gas prices reached as high as \$7 a gallon in some places. Cumulative inflation is 18 percent. And mortgage rates are pushing a brutal seven percent—making home ownership out of reach for countless young Americans.

When I was in office, the 30-year mortgage rate reached a record low of 2.65 percent—and the median-income American family could afford a mortgage.

Yet thanks to Biden's disastrous economy, interest rates have skyrocketed, making home-ownership out of reach for too many Americans, especially young Americans who in previous generations would be looking to start a family.

As a result, historically high numbers of young people are delaying marriage and children. According to a recent study, three quarters of Gen Z and Millennial couples believe it's too expensive to get married today. A 2022 study found that financial concerns are the number one reason why Americans are dropping out of school.

Sadly, many younger Americans are putting their lives on hold because they think the Biden economy leaves them no choice.

And on top of it all, Biden's war on American energy is making everything more expensive. Thanks to his Green New Deal agenda, new car prices have surged by nearly 30 percent since I left office.

The average new car now costs an astonishing \$50,000. You practically have to be a rich person to afford a new car. Because of higher interest rates and soaring prices under Biden, the typical car payment is now almost \$750 a month.

Instead of helping our young people confidently begin their lives, careers, and families, Joe Biden is crushing their dreams with debt, taxes, and inflation, and paving the way for a future of anger and despair.

Under Joe Biden, we are a nation in decline and rapidly losing the American Dream.

But Biden's destruction of the American economy is just the beginning of his war on young people. The Radical Left has also unleashed shocking waves of violent crime and bloodshed, making our nation's once-great cities almost unlivable for young Americans entering the workforce.

Joe Biden's unimaginable weakness on the world stage is threatening to drag the United States into World War III, which would devastate an entire generation of young Americans.

And the Democrats' radical promotion of Critical Race Theory, transgenderism, and other inappropriate racial, sexual, and political content in our schools has divided our communities and frayed the bonds of national unity.

When I take the oath of office as the 47th President of the United States, I will rapidly rebuild the greatest economy in the history of the world so that young people can thrive and prosper.

I will stop Joe Biden's inflation nightmare, increase energy production, massively reduce government spending, and bring down interest rates, so that young people can once again afford to start a family, buy a home, and plan for a great future—the basic building blocks of the American Dream.

I did it before, and we will do it once again.
