

PRINCESS RING ISLET

<https://www.2thepointnews.com/princess-ring-islet/>

This is real, it actually exists as you see

it. Princess Ring Islet is a small collapsed volcanic cone with a circular sunken crater. Talk about an awesome swimming hole. It's several hundred yards off São Miguel Island in the Azores – and is just one of the many totally cool places we see in our exploration of Atlantic Paradises this June.

At that time of year, the ocean around Princess Islet is filled with migrating whales and dolphins. The Azores are one of the world's greatest whale-watching sites. You'd be very hard-pressed to find a cleaner, safer, more peaceful, more benign, and more astonishingly beautiful part of our planet than the Azores. And with more perfect weather.

The rest of the world and its craziness doesn't exist here. Don't you owe it to yourself and the one you love to escape here for at least a short time? Of course you do. Just click on Atlantic Paradises to see how you can. Once you see all the pictures, I frankly don't see how you can resist! (*Glimpses of our breathtaking world #193*)
